Simple cases — TC01–TC08

ID	Test case	Main purpose
TC01	Normal MRI study with clear input	Basic pipeline execution
TC02	Study with one clearly identifiable abnormality	Basic detection
TC03	Study with no obvious abnormality	Normal-case handling
TC04	Complete study with all expected series	Complete-data processing
TC05	Clear task description + valid MRI input	Input handling
TC06	Same study with a different valid task description	Task interpretation
TC07	Clear abnormal finding with supporting images	Finding + recommendation flow
TC08	Repeat of a known case	Basic consistency

Moderate cases — TC09–TC16

ID	Test case	Main purpose
TC09	Study containing multiple MRI series	Multi-series handling
TC10	Study containing different imaging planes	Cross-series processing
TC11	Multiple possible abnormalities	Multiple-finding handling
TC12	Finding requires information from more than one series	Evidence combination
TC13	Partially incomplete metadata	Robustness
TC14	Larger-than-normal MRI study	Processing efficiency
TC15	Diagnostic output requires recommendation lookup	Tool integration
TC16	Diagnostic Agent produces uncertain result	Coordinator handling

Difficult cases — TC17–TC24

ID	Test case	Main purpose
TC17	Several possible abnormalities with similar appearance	Differential handling
TC18	Subtle abnormality	Difficult diagnostic case
TC19	Multiple abnormalities in one study	Complex result generation
TC20	Conflicting evidence between series	Coordinator verification
TC21	Diagnostic Agent produces incomplete output	Recovery/retry
TC22	Recommendation requires multiple trusted documents	Document retrieval
TC23	Trusted documents do not directly answer the case	Fallback search
TC24	Long multi-series study with several findings	End-to-end stress case

Edge cases — TC25–TC30

ID	Test case	Main purpose
TC25	No MRI file uploaded	Input validation
TC26	Unsupported file type	File validation
TC27	Corrupted/incomplete DICOM data	Error handling
TC28	Missing MRI series/slices	Incomplete-study handling
TC29	Agent produces conflicting results	Coordinator conflict handling
TC30	External web-search/tool unavailable	Fallback/error state
